

## Falling Through the Floor

They say sometimes you  
Gotta go down if you want to get up  
But that never made much sense to me

But stumbling up them rickety rungs  
Don't satisfy, or make you who you  
You want to be

Falling through the floor  
To the light  
Falling through the floor  
Into the light

Falling through the floor  
To the light  
Falling through the floor  
Into the light

Living life in shades of grey  
Can make you waste your soul away  
So go ahead and grab some paint

And don't let anyone  
Tell you just who you are  
And who you aint

Falling through the floor  
To the light  
Falling through the floor  
Into the light

Falling through the floor  
To the light  
Falling through the floor  
Into the light

So now you've got a choice to make  
About the path that you should take  
Or let take you

The wind can blow from west or east  
and clouds can hide the sun you seek  
But see it through

Falling through the floor  
To the light  
Falling through the floor  
Into the light

Falling through the floor  
To the light  
Falling through the floor  
Into the light
